- AMERICA** as a manufacturing country, 239.
- AMERICAN ECLIPSE** for sale—His pedigree, 336.
- AMERICAN TURF REGISTER**, and Sporting Magazine. Prospectus of 19. Contents of the First Num-

- ber, 191. Favourable notice of. Contents of the Second Number, 231. Contents of the Third Number, 271. Contents of the Fourth Number, 312. Contents of the Fifth Number, 335. Contents of the Sixth Number, 384.
- AMPHICON**, on the value of Railways, and the losses sustained on Cotton in one season, 85.
- ANDREWSIA**, a beautiful estate, described and for sale, 264.
- ANDROMACHE**, (sorrel mare) pedigree of, 30.
- ANIMALS**, use of the whiskers of, 166. Attachments formed by, 166. On the changes which take place among Domestic, transported from Europe to America, 210.
- ANNUALS**, English, cost of, &c., 407.
- APPLES**, large pippins raised on the farms of Judge McMechen, and Dr. James Smith, 200. Directions for preserving till late in the year, 205. On the preservation of, by Noah Webster, 221. Large product of, from a single tree, 356.
- APPLE TREES**, washing with soft soap, pernicious, 108. Remarks on the Sweet Greening, by James Thacher, 276.
- ARACACHA**, remarks on the cultivation of in the United States, and the Island of Cuba, by Dr. Samuel L. Mitchell, 325.
- ASCLEPIAS SYRIACA**, or Silky Swallow Wort, remarks on, by A. Parmentier, 340.
- ATTAR** of Roses, manner of obtaining it, &c. 96.
- AVALANCHE**, in Switzerland, remarkable prevention from 87.
- AZOREAN PARADISE**, description of 215.

### B.

- BACON**, directions for making good, 388.
- BALM OF SWEET WOOD**, method of procuring it, 134.
- BARLEY**, produce of a few States, by the Editor to Alabama, 103.
- BARONET**, pedigree of, 38.
- BATHING**, directions for, 35.
- BEANS**, new variety of, 183.
- BEDFORD COUNTY**, Penn., sketch of, manner of clearing new lands, its soil, productions, &c. &c. in answer to Captain Basil Hall's queries, by Thomas B. McElwee, 106, 114, 130.
- BEDS**, on the proper material for, &c., 333.
- BEDSTEADS**, improvement in, 279.
- BEEF**, how to keep, by Cousin Tabitha, 27. Market at Brighton, Mass., 211.
- BEER**, how to make cheap and wholesome, 175. To make ginger, 191.
- BEEES**, keeping of, in this country strongly recommended, 5. Salt supposed to prevent the destruction of, by the worm, 60. Notice of a new manual for the proprietors of, 61. Remarks by Medicus, on the use of salt, in the management of, 84. Experiment with charcoal in the management of, 149. Inquiry as to the number of a swarm, 150. On the management of, by Mrs. Griffith, 189. Curious fact in the economy of, 196. Practice of the bee masters in Germany, 267. On managing. Swarming of, 297.
- BEETS**, process of extracting sugar from the roots of, 131. Advantages to France from the culture of the sugar, 132. Memoir of the manufacture of sugar from, 163, 267. Remarks on the Sinclair, by L. Jenkins, 235. Notice of two large ones, 356.
- BELLINGER**, Doctor J. S. on the cultivation of yam potatoes from roots and slips, 11.
- BIDDLE**, N. his address at the opening of the Chesapeake and Delaware Canal, 300.
- BIRDS**, swiftness of, 413.
- BLACKING**, recipe to make Day & Martin's, 15.
- BLAZE**, pedigree of, 46.
- BONAPARTE**, Joseph, description of his seat near Bordentown, N. J., 182.

- BONES**, on the advantages of, for manure, 354.
- BOT FLY**, or Nitter, remarks on, by Professor Eaton, 68.
- BOTTLING WINE**, directions for, 77.
- BOTTS** in Horses, remedy for, 54, 133, 328.
- BOXER**, pedigree of, 46.
- BREWING**, Domestic, remarks on, with an engraving of a portable apparatus for, 36.
- BROCOLI**, Virginia, 303.
- BRODNAX**, Alex., on the cultivation of the Irish Potato, 42.
- BUCKWHEAT** straw, produces excellent potash, 179.
- BUEL**, J. recommends planting the Sugar Maple, 83. On sheltering farm lands, 315.
- BULL**, E. W. notices the "Columbian" or "Buck" Grape, 220.
- BUTTER**, the art of making in the winter season, 15, 309. Rules for making good, 220. Quantity of, made in Massachusetts and elsewhere, from the different breeds of cows, 238.

### C.

- CALCINED MAGNESIA**, prepared at the Maryland Chemical works, remarks on by the Editor, 111.
- CAMEL** fights at Smyrna and Aleppo, 221.
- CAMELLIAS**, culture of, 300.
- CAMPHOR**, to prepare without the use of alcohol, 351.
- CANALS**, on the present state of the New York, Ohio, Maryland, and Pennsylvania, 252. Description of the Great Dutch, 141.
- CHESAPEAKE and DELAWARE, opening of 292, 300, remarks on, 343.
- CHESAPEAKE and OHIO, progress of, 93.
- DISMAL SWAMP, commerce of, 310.
- UNION, Pennsylvania. Act in favor of, prospects of, and trade upon, 93.
- CANDLES**, consumption of, 22.
- CANE BRAKE**, description of one, 35.
- CANKER WORM**, remarks on, by H. A. S. Dearborn, 341.
- CAPE MAY ISLAND**, sketch of a four days' visit to, and of a fishing excursion, by one of the party, 145.
- CARDMAKING MACHINE**, notice of, 350.
- CARROLL**, Charles, of Carrollton, remarks by the Editor on the 92d anniversary of his birth day, 223.
- CARROLL**, James, Jr. on housing corn, 268.
- CARROT**, red, on the cultivation of, and its value as food for horses, by W. W. Cook, 378.
- CARTER**, George, on the fire blight in pear trees, 227.
- CARTER**, Col. Loudon, on the Wheat Weevil, its history and mode of preventing its depredations, &c. 369.
- CASTOR OIL**, Process of making, by Doct. Robert R. Harden, of Georgia 19.
- CATHOLIC DISABILITIES** in England, 54.
- CATTERPILLARS**, best time for destroying, 53.
- CATTLE**, account of the Chowry-tailed cattle of Tibet. (with an engraving,) 25. Dead weight of stock exhibited at the Smithfield (Eng.) Club Cattle show. Properties and value of salt in feeding, 55. Value of the improved Short horned, in England 62. On the qualities of the improved Short Horns, by R. K. Meade, 82. Cost of an apparatus for steaming food for, 83. Quality of, in Bedford Co. Pennsylvania, 108. Description of some fine stock of the Alderney and Hollderness breed, owned by Jno. Prince, 139. On the importance of wholesome water to, treatment of wounds in, 149. New market for proposed, 151. Plan of a feeding shed, with an engraving, 156. On feeding, with a table, showing the relative value of different Grasses, by G. Sinclair, 182. On improving our native breed of, by Col. Pickering, 194. Disease in, and cure for, 220. On Stock Cattle, 223. On the present state of some of the improved breeds of, in Great Britain, 235. On Shifting and Stall feeding

**CROPS**, exhausting and ameliorating kinds, 17. Prospects of in Maryland, 26. In Virginia, 43, 157, 167. New York, 123. Georgia, 128. N. Carolina, 131. Delaware, 157. Pennsylvania 157.

**CUCUMBERS**, large ones raised in the garden of G. B. Smith, 167.

**CULTIVATION**, in Long Island, N. Y. Observations on some subjects of, by And. Parmentier. 17.

**CURCULIO**, description of the, 140.

**CUTS**, chowry tailed bull of Tibet, 25. Portable brewing apparatus, 36. Showing the parts of a complete flower, 65. The celebrated American horse Tom Thumb, 110. Of Pointers, 142. Feeding shed, 156. Title of "Turf Register," 196. Manuring Wagons, 203. Of horses' mouths, 233. Of silk worms, 236. Of the fox, 285. Of Bergami, a Maltese Jack, 296. Silk reels, 316. Horse shoes, 321. Of the common Deer, 349. Of the Wolf, 366. The "Novelty," Nos. 1 and 2, 382. "Novelty" No 3, 390. The "Rocket" and "Sans Parier" 397. Of Raccoons, 414.

## D.

**DAHLIAS**, varieties of, in Mr. Prince's nursery, 268.

**DAIRIES**, in Massachusetts, great product of, 228.

**DAMP**, rust, &c., protection against, by John Murray, F. S. A., F. L. S. &c., 87.

**DANDELIONS**, produce and value of, 100.

**DARBY**, Wm. on the population of Europe and the United States, with a table, 22.

**DEARBORN**, H. A. S. on the Canker worm, 340.

**DEER**, Common, Natural History of, with an engraving, 349.

**DE L'AIN**, M. GIROD, letter from, to the Editor, acknowledging receipt of the "Farmer," Diploma of Membership, &c. sends notes and pamphlets on agricultural subjects, 79.

**DE MOLEON**, Mons. J. G. V., letter from, to the Editor, proposing an exchange of publications, &c., with the Editor's reply, 39.

**DIETETIC** Regimen in France and England, 270.

**DIOMED-EAGLE**, pedigree of, 38.

**DISTEMPER** in Dogs cured by the application of *lead bullets*, 29. Cure for, by an old Sportsman, 46. Vaccination, an antidote to, 367.

**DOGS**, extraordinary race of beagles, imported from Liverpool—distemper in, cured by *lead bullets*, 29. Cure for distemper in, 46. Pointers, with an engraving, 142. Cure for the Mange, 215, 367. Do. for Cancer in the lips of, 215. Leaves of the Pride of China tree drives the fleas from, 253. Notice of an extraordinary one, 326. Vaccination an antidote to the distemper in, 367.

**DRIVER**, pedigree of, 131.

**DRUMMOND**, Z. on priming and topping tobacco, 195. On the improvement of land, 227.

**DUCKS**, on the flying kite used as a decoy for, 247.

**DUNLOP**, A. Campbell, of North Britain, on the cultivation of indigo and preparation for market, 74.

**DUVAL**, Judge, communicates an account of great running by Selim, at Philadelphia, and Figure at Upper Marlboro', 125.

**DYSPEPSIA**, remarks on, with directions for relieving it, by a dyspeptic man, 198.

## E.

**EAR**, physiology of the, 71.

**EATON**, Professor, on the Bot fly, or Nitter, 68.

**ECLIPSE**, American, his pedigree, 336.

**ECLIPSE**, (Sir John Shelly's sorrel colt,) pedigree of, 29.

**ECLIPSE HEROD**, pedigree of, 30.

**ECONOMY**, importance of, in a family, 46.

**EDITORIAL REMARKS**. On Vermont; as an economical government. On the Maryland Legislature, 7. On percussion powder, 14. On Col. Long's Rail Road Manual, 28. Correspondence between the Editor and M. De Moleon. On riding on horseback, recommended to the ladies, 39. On public country roads, 44. On Mnemonika, or tablet of memory, 46. Describing the Jackson Bridge, 62. On cock fighting, 79. On the healthiness of Baltimore, 87. On the Post Office Department, 102. On the importance of subscribers remitting punctually, 103. On the broad tailed sheep. On pedigrees. On the Calcined Magnesia, prepared at the Maryland Chemical Works, 111. On the course of education proper for youth, 119. On the proposal to publish an "Elementary treatise on Natural History," 127. On the Post Office laws and regulations, 134. On the latent qualities of water, 149. On the silk culture, and market for the cocoons, 151. Suggesting the establishment of a horticultural society in Maryland, 159. On the manumission of negroes. On the *Swiss chard*, a new vegetable. Large cucumbers, 167. To subscribers, 167. Two days in the country. Recommending the N. York Mirror. On a new variety of green beans, 183. On the price of wheat. Acknowledging the receipt of the plate presented by the Agricultural Society of South Carolina. On a specimen of silk from Virginia, 191. On hounds, 197. On the ninety-second anniversary of the birth day of Charles Carroll of Carrollton. On stock cattle. The corn crop, 223. On the Jackson bridge. On wool and sheep. Silk Society of Philadelphia, 231. On the Oriolan, or rice bird, 339. On the Journal of Health, 240. On G. B. Smith's newly invented silk reel, 263. On Dishley sheep, 268. On education, and the Lafayette Institution, 286. On the Legislature. Virginia Brocoli. Mr. Randolph, 303. On the Durham short horn cattle. Turf Register, 311. On the General Post Office Expresses. Patent implements, 320. On the militia system, 327. Exposing impositions in grapes. On the American Almanack, 335. On the Encyclopedia Americana. Baltimore and Ohio Rail Road. Chesapeake and Delaware Canal, 343. On a new planting machine, 351. On the raising of horses. On the cultivation of the sugar cane, 359. On the experiments on Rail Roads, 367, 375. On horticultural societies, 375. On the Lafayette Institution. Silk worms. Chloride of lime, 393. On the want of an establishment for the sale of horses, &c., 399. On the true principles of farming, 401.

**EGG PLANT**, large one, 255.

**EGGS**, how to preserve fresh for a year, 96.

**ELLIOTT**, Wm. on the cultivation of fine cotton, and the selection of seed for that purpose, 11.

**ELM**, astonishing product of the, 55.

**ENCYCLOPEDIA AMERICANA**, notice of, 343.

**EXCISE REGULATOR**, notice of it, 174.

**EXCISE**, remarks on, 262.

## F.

**FAIRS** in Great Britain, account of, with the amount of cattle, sheep, &c. sold at them, 62. English and Irish, 355.

**FALLOW**, summer, advantages of, by W. Aiton, 257.

**FALLOWING**, observations on, by Joseph Lambert, 266.

**FARM ACCOUNTS**, on keeping, by Albion, with a plan, 1.

**FARM LANDS**, on sheltering, 276. Remarks on, by J. Buel, 315.

**FARM SERVANTS**, on the payment of, in produce, 17.

**FARMER**, signs of a poor one, 195.

**FARMER'S LIFE**, advantages of a, 99.

**FARMS**, report on, delivered at a cattle show and fair in New Hampshire, 291. Award of premiums on, 282.

**FARMING**, remarks on, from Flint's Western Review, 298. On the true principles of, by the Editor; examples of good, shewing the advantages of thorough culture in producing great crops, 401.

**FARMING ECONOMY**, a dialogue on, 252.

**FARMING MEMORANDA**, with a plan of the rotation of the crops in the fields, and a calendar, 49.

**FARMING**, (profitable) in Pennsylvania, 151. Do. in the vicinity of Boston, Mass., 388.

**FEATHERS**, how to clean old ones so as to be better than new, 5.

**FEDERALIST**, pedigree of, 38.

**FEEDING SHED** at Mellerstain, belonging to George Baillie, Esq. (with an engraving,) 156.

**FISHERIES** of Massachusetts, general account of &c., 222.

**FLAX** plant of New Zealand, should be introduced into the United States, 151.

**FLAX SEED**, exportations of, from the U. States, 35.

**FLEAS**, natural history of, 166.

**FLORAL and HORTICULTURAL** exhibition at New York, 117.

**FLORIZEL**, (Hellen's imported) pedigree of, 38.

**FLOWERS**, ornamental, remarks in favour of their cultivation, 149.

**FLOYD**, General, on the cultivation and preparation of indigo, 33.

**FODDER**, on topping and pulling from Indian corn, 258.

**FOOD**, animal and vegetable, on the use of, 279.

**FOREST TREES** of North America; on the natural succession of, 306.

**FORMAN**, Gen. T. M., on feeding silk worms with Maclura, 179.

**FOX**, natural history of the, (with a cut) 285.

**FOXES and Birds of Prey**, to destroy, 163.

**FROST**, early in Tennessee, 223.

**FRUIT TREES**, to preserve them from the canker, rust, moss, &c., 124. On rendering them fruitful by operating on the borders, and by natural training, by Robert Hiver, 140. Observations on certain insects that prey upon peaches and plums, 180. On the culture and preservation of the peach and pear trees, 195. On the cultivation of the peach, by Henry Ingraham, 204. On blight in pear trees, &c. On scoring peach trees, 212. On the fire blight on pear trees, by George Carter, Esq., 227. Directions for planting, 252. On planting on the sides of hills, 268.

**G.**

**GARDENERS**, useful information for, 132.

**GINGER** successfully cultivated in Georgia, 172.

**GOATS**, on the difference of conformation, &c. between them and sheep, 265.

**GODOLPHIN** on the management of vicious horses, 412.

**GOLD**, discovery of, in Burke county, N. C., 95. Do. in Spotsylvania county, Virginia, 200. Some account of the mines of North Carolina, by D. Keinhart, Esq., with notes, by Professor Olmstead, 222. Estimated product of the North Carolina mines, 383. Yield of, at Bundletown, N. C., in one week, 399.

**GOOSE**, singular attachments of one, 118.

**GOOSEBERRY** bushes, diseases in, and remedy for, 31.

**GOUT**, relieved by the application of cotton, 95.

**GRAFTING**, materials for, how to prepare, by J. Lowell, 99. New method of, communicated by J. Lowell, 196. Stocks proper for, 276.

**GRAIN**, account of, measured in Philadelphia for the two first quarters of 1828 and 1829, 163. On the diseases of 242, 250. Preservation of, in reservoirs of clay, 327.

**GRAPES**, on the cultivation of, by an Amateur, 18. On Stemming, 27. The vintage of 1828, in Europe, 27. Account of a remarkable vine, reared by Mr. John Willis, Oxford, Md., 87. On the culture of, in Alabama, 91. Sovereign remedy against mildew on, by Wm. Prince, 132. On the Lachryma, as a proper one for the United States, 172. To raise without seed, 213. Notice of the "Columbian," or "Buck," by E. W. Bull, 220. On the vines and vineyards of America, by Thomas Gimblede. Foreign grapes likely to succeed in the U. States, 228. Notice of a native discovered in South Carolina, 232. On the culture of, and the manufacture of wine, by N. Herbermont, 237. Remarks on the Isabella, 291. The white Scupper-

nong, 292. Method of planting cuttings, 316. Varieties most generally used for making wine, 324, 331, 340. Remarks on the Isabella, 325. Imposition in new kinds of, detected and exposed, 335. Remarks on the Susquehanna, by Wm. Prince, 347. On the cultivation of, by N. Herbermont, 371. Advantages of engrafting native vines with those more delicate and choice. Notice of some large vines in England, 380. Pruning, 411, 412.

**GRASS LANDS**, use of the roller on, 17. On laying down, (in answer to queries) by F. J., 18. On the kinds that ought not to be broken up by the plough. On the advantages and disadvantages of breaking them up, 309. On the management of permanent, 377.

**GRASSES**, on the cultivation of the tall meadow Oat, by E. P., 42. On sowing the seeds of, in the fall, 57. Want of, in Louisiana, 83. On the florin, and other kinds of, by Joseph Lambert, 266.

**GREVILLE ROSE**, description of a beautiful one, by J. B. Smith, 179.

**GREY DIOMED**, pedigree of, 38.

**GRIFFITH**, Mrs. (of Charlieshope, N. J.) on the management of bees, 189.

**GRIST MILL**, Forwood's, certificates in favour of, 292.

## H.

**HAMILTON**, Essay by, on the advantages of Rail Roads, with Engravings, 372, 380, 388, 397, 405.

**HARDEN**, Doct. Robt. R. on the process of making Castor Oil, 19.

**HARVARD UNIVERSITY**, commencement of, 103.

**HAY**, product of, on the farm of Amos Hill, in Massachusetts, 156. Do. on a small portion of ground at the Navy Yard, at Norfolk, Va, 219.

**HAY MAKER**, notice of an aged one, 200.

**HAYWARD**, Joseph, on the necessity and advantage of inquiring scientifically into the practices and results of Horticulture, 306.

**HEAT**, extraordinary experiment with, 174.

**HEMP**, cultivation and preparation of, as practised in Kentucky, by a Kentuckian, 4. On the cultivation of, and preparation for market, by Samuel Lathrop, 41. Comparative strength of Connecticut and Russia, 57. Hines and Bains, machine for cleaning, notice of, 90. McComb's machine for cleaning and preparing for market, recommended, 121. On the cultivation of, 275. Report to the Legislature of Ohio, on the culture of in that State, with a calculation shewing the probable profit per acre, 393.

**HERBEMONT**, N. on the culture of the Grape, and the manufacture of Wine, 237, 372. Sends Grape Cuttings to the Ag. Soc. of N. Carolina, 411.

**HERRINGS**, Dutch method of curing, 132.

**HIVER**, Robert, on rendering fruit trees fruitful, by operating on the borders, and by natural training, 140.

**HOGS**, on feeding, 195. On feeding, and diseases of, 226.

**HONEY COMBS**, how to extract the wax from, 100.

**HOP MARKET**, in England, 267.

**HORSE MILL**, favourable notice of, by E. F. Chambers, Esq., 91.

**HORSE POWER**, estimates of, 317.

**HORSES**, pedigree and performance of Serab, 8. Do., (corrected) 16. On white hoof in, 21. Maryland Eclipse, to stand at Baltimore—his pedigree, 24. Pedigrees of Hall's Eclipse, Telegraph (bred by Mr. Loughbrough,) 29. Do. of Telegraph, (bred by Mr. Baldock), Clifden, Old Cub, Andromache, Eclipse Herod, Punchinella, Punch, 30. Qualities of War Horses. Newly invented brush for. Pedigrees of Grey Diomed, Driver, Baronet, Federalist, Hellen's imported Florizel, Wonder, Diomed-Eagle, 38. Pedigrees of Boxer, Quicksilver, Melzar, Blaze, Cormorant, the Marylander, and Rasselas. Mash for a horse after a severe hunt, 40. Pedigrees of Mask and Sir John Moore, 53. Stirling and Southern Eclipse. Remedy for the botts, 54, 133. Remarks on corns in the feet of, by Doctor Townsend Cocke, 59. Pedigree and performances of Timoleon. Obituary of Stallions, 70. Pedigree of Eclipse wanted, 61. Pedigree of Speculator, 79. Pedigree and performance of John Stanley—pedigree of Ratler, 86. Description of the celebrated American horse Tom Thumb, with an engraving of him in the act of performing his match of 100 miles, &c., 110. Strength of, in Pennsylvania, 114. Successful operation,

ration for the stone in the bladder of a horse, at the Veterinary College, London, 119. Complete treatise on, teaching how to judge them; to rear and manage them; how to improve their breed; to prevent or to cure the maladies and accidents to which they are liable; and to derive from them the most value under all circumstances: useful to breeders and farmers, engaged in the rearing of these interesting animals; to officers of cavalry or inspectors of recruits; to keepers of livery stables, sportsmen, or veterinary surgeons; to stage proprietors, travellers, farriers, horse jockies, amateurs of the horse, &c. &c. by an officer of the French cavalry, translated from the French, 137, 154, 177, 193, 217, 233, 257, 321. Pedigree of Trumpator, 142. On raising of colts, by W. R. Johnson, 197. Arabian horses described, 231. Remarks on the pedigree of Printer, 272. Letter from Wm. Lamme, respecting the horse Eclipse, (supposed an imposition,) 304. On the staggers, or inflammation of the brain, its cause, symptoms, and treatment, 332. Pedigrees of American Eclipse, and Sam Patch, 336. Remarks on the raising of, by the Editor, 359. Red carrot excellent food for, 378. On the management of vicious, 412. — and MEN, character of, 302.

**HORTICULTURE**. Letter from S. Baillie, Esq. of Virginia, to William Prince on Fruit trees. Cheap method of forcing rhubarb, 5. Extracts from Wilson's Principles of Botany. On the cultivation of the Spanish chestnut, Madeira nut, or English walnut. Letter from J. Cable, to William Prince, on the grapes, &c. of Mexico. On the management of an orchard, &c., 12. Silk worms, Cocoons, &c. French method of transplanting, 13. On the cultivation of the grape, by an amateur, 18. On the manufacture of Castor oil, by Doctor Robert R. Harden, of Georgia, communicated by G. B. Smith, 19. To make old seeds vegetate, by Wm. Prince, 20. Notice of the "Vine Dresser's Manual," with extracts from, on the vintage. Stemming the grapes, 27. The vintage of 1828 in Europe, 27. List of officers, and address, of the Maryland Society for the cultivation of the vine, 35. Art of making wine, 26, 43, 52, 59, 68, 77. Best time for destroying caterpillars, 53. Remedy for the grubs in peach trees, 60. Infusion of walnut leaves to destroy insects, 69. On the cultivation of rhubarb, 75. Observations on destructive insects, with the means of destroying them, 76. On the Elm, 84. On the cultivation of the native grape, and sugarcane, in Alabama, 91. Culture of the white mulberry tree, 92. On the use of charcoal dust as a top-dressing for onions, &c., 92. Vegetable origin of silk, 99. Cultivation of tea in China. Fine qualities of pine apples and melons, produced by steam. Tenacious and prolific vegetation in a potato. Dandelions, 100. Use of soft soap on apple trees. Ravages of caterpillars on fruit trees; how to destroy them, 108. On the culture of the grape, by A. B. Cook, 116. Frost conductor. Floral and Horticultural exhibition at New York. Mr. Prince's Botanic gardens, 117. On the disease among silk worms, by Orlando S. Rees, with a reply, by Gideon B. Smith, 123. To prevent the canker, black rust, &c. on fruit trees, 124. Sovereign remedy against mildew on grapes, by W. Prince. Notice of Mr. Parmentier's garden. Useful information to gardeners, 132. Description of the Curculio. On rendering pear, and other fruit trees, fruitful, by Robert Hiver, 140. On the cultivation of ornamental flowers. Exhibition of the New York Horticultural Society, 149. First semi-annual exhibition of the Pennsylvania Horticultural Society, June 6, 1829, 157. Account of an insect injurious to the vine, 158. Remarks on the establishment of Horticultural Societies, by the editor of the National Gazette. Compliment to the gardens of the Messrs. Landreth's and Col. Carr, by the same, 159. On raising tomatoes from cuttings, 164. On the disease of silk worms, with remarks by G. B. Smith, 171. The Lachryma grape, Georgia ginger, potato farina, Alabama silk, 172. Culture of silk in Ohio. On feeding silk worms with Maclura. Description of a beautiful Greville rose, 179. Observations on certain insects that prey on peaches and plums. Average price of vegetables sold in Washington, (N. Y.) market, for July, 1829. Fallen or decayed fruit to be gathered. Productions of Florida. Tea shrub, 180. Potato grafted on the

tomato. To destroy the fly which infests the carnation. Method of destroying the red spider in hot houses, 188. On the culture and preservation of fruit trees, 195. New method of grafting. Large radish, 196. On the cultivation of the peach, by Henry Ingraham. On the cow-tree of Caraccas, 204. Currant and Fox grape wine, 205. On blight in pear trees. *Holcus Bicolor*, a substitute for chocolate. On scoring peach trees, 212. To raise grapes without seed, 213. Inquiry respecting the morning star. Notice of the "Columbian" or Buck grape, 220. On the fire blight on pear trees, by George Carter, Esq., 227. On the vines and vineyards of America, by Thomas Gimbrede. On foreign grape vines as likely to succeed in the United States, by W. Prince, 228. On the diseases of silk worm, with cuts, by F. Duser, and Orlando S. Rees. Culture of the grape, and the manufacture of wine, by N. Herbmont, 237. The Sinclair Beet, 238. Visit to Parmentier's nursery and garden, 243, 260. On the Petre pear, by Robert Carr, 243. Sweet almonds, filberts, &c., notice of the "Sylvange Vetre" pear. Planting of fruit trees, 252. Growth of the vine on the Alleghanies. Soy bean, 260. Cherry stocks, 261. Answer to inquiry respecting Morning Star, by William Prince. On the Palo de Vaca, or Cow tree of Caraccas, by do. Great produce of pumpkins. The Dahlia. Pole beans. On planting fruit trees on the sides of hills. Manufacture of sugar from beets, 268. On the Arbol de Leche. Palo de Macha. Milk tree, or cow tree, by W. Prince. New grape described by J. B. Garber. Stocks for grafting. Lime plant. Sweetgreening, 276. American grapes. The Isabella, 291. The white scuppernong. Expenditures and receipts of the London Horticultural Society, 292. Culture of Camellias, 300. On the necessity and advantages of inquiring scientifically into the practices and results of, by Joseph Hayward, 306. Grape cuttings. Ever bearing strawberry. New work on silk. G. B. Smith's improved silk reel, with cuts, 316. Silk worms. Wilmot's superb Strawberry, 317. Wine grapes, 324, 331, 340. Isabella grapes. The cocoanut squash from Lima. On the cultivation of the Aracacha plant in the United States and Cuba, by Dr. Mitchell, 325. Importation of plants from South America. New plants from the Western coast of North America. Silk worms raised on leaves of the scorzonera, 332. On the *Asclepias Syriaca*, or silky swallow wort, by A. Parmentier. On the canker worm, by H. A. S. Dearborn, 340. Large product of pumpkins. Acorn squash, 341. Preparation of pea-nut or ground nut, and its culture, by Andrew Parmentier, 346. Susquehanna grape. Culture of indigo, 347. Private kitchen gardens. Sweet locust, or three thorned Acacia, 364. On the cultivation of the grape, by N. Herbmont, 371. Notice of Robert Sinclair's nursery, near Baltimore. Cultivation of celery, 372. Extracts from the *Annales D'Horticulture*, 378. The advantage of engrafting native vines with those more delicate and choice. Notice of some extraordinary vines in England. The Cork tree, 380. On the bleeding of the vine, by A. Parmentier, 396. On the proper size of trees for transplanting, 403. Preventives against the fly on carnations. H. A. S. Dearborn and others elected honorary members of the Horticultural Society of Paris. List of premiums offered by the Massachusetts Society, 404. Address of the Pennsylvania Silk Society to the public, 410. Pruning Grape Vines, 411, 412. Transplantation of Trees and Shrubs in full verdure. Grape Vines sent by N. Herbmont to the Agricultural Society of North Carolina, 411.

**HORTICULTURAL SOCIETY, OF ALBANY**, Exhibition of, 375.

—OF MASSACHUSETTS, premiums offered by, 404.

—OF NEW-YORK, brief notice of their exhibition, 149.

—OF PENNSYLVANIA, first semi-annual exhibition of, June 6, 1829, 157.

**HOT SPRINGS**, of Arkansas, 311.

**HOWARD**, Roland, on the cultivation and value of flat turnips and ruta baga, 74.

**HUSBANDMAN**, (the) his character, 164.

**HUSBANDRY**, convertible, the merits of, united with soiling, explained and illustrated by a comparative statement of Crops, 273.

**HYDROPHOBIA**, remarks on, and remedy for, suggested, 334. On the use of Chlorine as a preventive of, by Dr. J. E. Muse, 404.

## I.

**ILLINOIS** Military bounty Lands, remarks on, 355, 362.

**INDEPENDENCE**, a new declaration of, 150.

**INDIGO**, on the cultivation and preparation of, by Gen. Floyd, of Georgia, 33. Do. by A. Campbell Dunlop, of Sheldon, North Britain, 74. Manufacture of, in South Carolina, 164. Notice of a new description of the plant, 255. Cultivation of, in North Carolina, 300, 324. On the culture of, in South Carolina, 347.

**INSECTS**, destroyed by an infusion of walnut leaves, 69. Observations on destructive kinds of. How to destroy the rose-bug, 78. Remedy to prevent stuffed animals from being attacked by them, translated from the French, by Master Theod. B. Skinner, 151. Observations on certain kinds that prey upon peaches and plums, 180. Utility of, 348.
